

Geology A level pre-course task

- 1) You will need to get an A4 ring binder folder and bring this to your first Geology lesson. You should also include 7 page dividers (one for each module). Print a copy of the course content from the internet and put it into your folder. You will only need pages 12-58 of the document. You can find this at – <http://www.ocr.org.uk/Images/322105-specification-accredited-a-level-gce-geology-h414.pdf>
- 2) Create a fact file about the geology of our Solar system. What are the planets made of? What density/ temperature/ properties do they have? Do not ‘copy and paste’ information. Restrict your notes to 3 points per planet.
