

# FASHION & TEXTILES

## COURSEWORK HELP

Any gaps in your folder need to be addressed  
Spend an hour per evening focussing on your folder  
Make a weekly plan for what you are going to do for each lesson and each evening

Where do you want to be in 8 weeks time?  
Make an overall plan for the next 8 weeks  
Work backwards week 8 - week 7 - week 6 etc

Plan your materials and components

Create a production plan whilst you are working

Photograph everything you do

Manufacturing diary is key - you need to show how your product was made.

This can be a table or a written document but needs to include photos.

### Evaluation Reports

Although you have analysed your workings throughout your portfolio you will need to produce a range of evaluation reports.

You will need:

- Comparison against the specification
- Designing report
- Making report
- Performance report (with client feedback)

You will also need to discuss how your product could be further developed if a design and development team were to take your initial concept further. This may include a redesign of some or part of the product or an extension collection.
