

## Calculators

Students studying A level Mathematics or A level Further Mathematics must purchase an A level specific calculator.

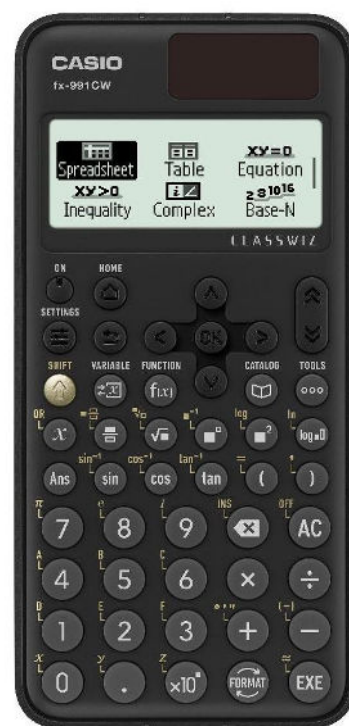

The model we recommend is the **Casio fx-991 CW**. This is pictured on the right and is the current model for A level students.

Students will not be able to use the calculator they used at GCSE as GCSE models of calculators do not have all of the features and buttons needed for A level study and A level exams.

The **Casio fx-991 CW** can be purchased from stationary shops like WH Smiths, from supermarkets or from online retailers like Amazon and usually sells for around £30.

Students studying Further Maths A level need the **Casio fx-991 CW** but do not need any additional calculator.

Please ask your maths teacher if you have any questions about this.
