Learning Objective:
 To understand the colour theory
 To create a cake colour wheel

Colour the colour wheel with the correct colours, as well as the colour schemes

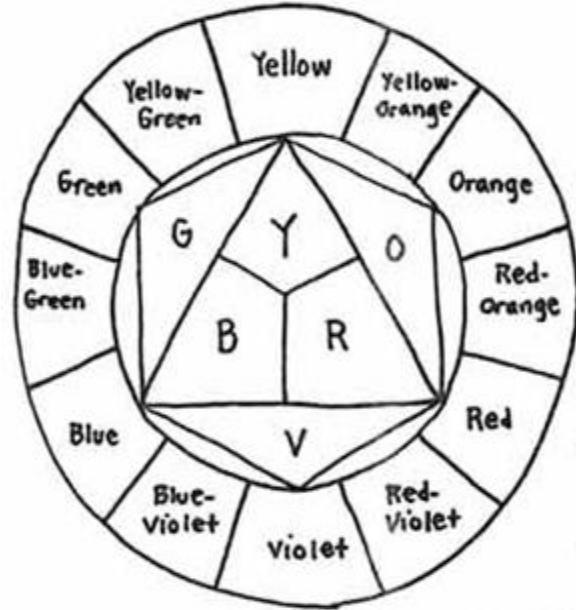

COLOR THEORY

Color is an element of art.

Everytime I use color, I am creating a color scheme.

← This is a color wheel.

The most common color schemes are listed below.

Primary... [Three boxes] {I can make all the other colors by mixing different amounts of primary colors}

Secondary... [Three boxes] {I can mix two primary colors to make a secondary color.}

Warm... [Five boxes] {Yellow and all the colors with red and orange tones are warm.}

Cool... [Five boxes] {Violet and all the colors with blue and green tones are cool.}

Complimentary... [Six pairs of boxes] {Opposites on the color wheel are complimentary.}

Analogous... [Four groups of boxes] {Colors that are close neighbors on the color wheel are analogous.}

Rainbow... [Seven boxes] {Using primary and secondary colors placed in order from the color wheel, I can make a rainbow}

Intermediate... is a color term I need to know. It is the color in between the primary and secondary colors on the color wheel.

Learning Objective: To create a cake colour wheel
