

# MECHANICAL INSECTS

---

## **SREAMPUNK CREATURES DRAWING**

### **What shall I draw on?**

Stain a piece of paper that we will use to draw on this lesson. Don't get it too wet!

Leave to dry on your table while I talk to you all.

Thinking Questio.... What is Steampunk?

# Learning Objective

To create drawings inspired by the mechanic animals of Vladimir Gvozdev

Russian artist Vladimir Gvozdev, also known as Gvozdariki, has a special touch when it comes to the steampunk genre. His mechanic animal menagerie is nothing short of whimsical, and somehow a bit childlike. As in, there is a small sense of wonder captured in each painting. So it should come as no big surprise that Gvozdariki has a fascination with recapturing his childhood

# Learning Objective

To create drawings inspired by the mechanic animals of Vladimir Gvozdev

Create a mechanical insect or animal drawing inspired by Vladimir Gvozdev and Steampunk

## Success Criteria

You have drawn the shape of the insect

You have added mechanical objects such as nuts, bolts, cogs, pipes and screws to the the insect.

You have coloured the insect and used tone to show texture.

## How shall I draw it?

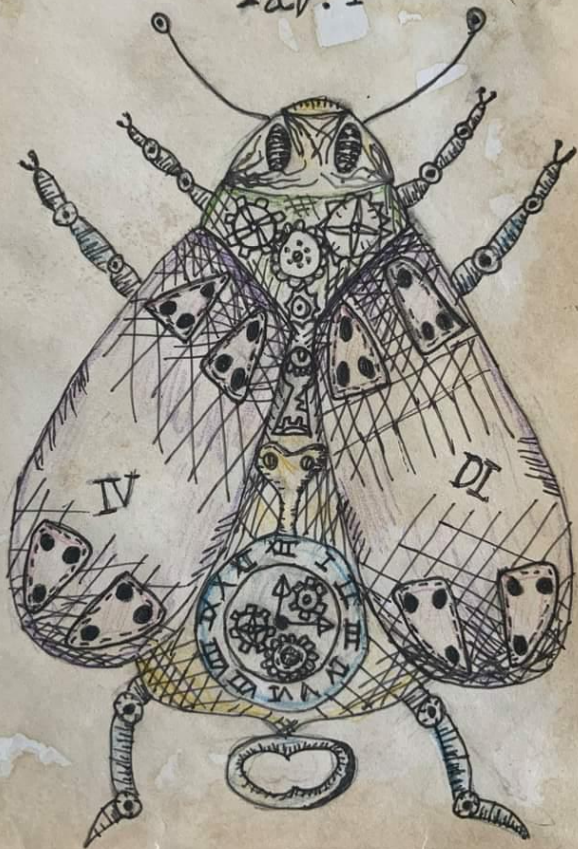

You will draw your mechanical insects in 3 steps.

1. You can begin a light outline of insect in pencil.
2. Add COGS and MECHANICAL OBJECTS.
3. Work up your drawing in pen, or dip pen and ink using line, hatching and cross-hatching.

### **Can I add colour?**

Yes! I have blended some different coloured pencils into my drawing. Be careful not to press too hard or you will cover your lines up.

I then scrunched up my page and scuffed some of the creases to make it look like an old piece of paper.

### **What if I have finished?**

Think about creating a whole page of these mechanical insects, changing the size and position on the page.
